

E-COMMERCE PERFORMANCE DASHBOARD

- **PROJECT NAME: E-COMMERCE**
- **TEAM MEMBERS: ABHI, AJITH, OM, ANIKETH, BINNU**
- **MODULE: EXCEL**

INTRODUCTION

A person wearing a dark hoodie is seen from behind, sitting at a desk in a dimly lit room. The desk is cluttered with three computer monitors, a keyboard, a mouse, and several mugs. The monitors display various data visualizations, including charts and graphs. The background is a blurred cityscape at night, with neon lights and rain visible through the window. The overall atmosphere is futuristic and tech-oriented.

- **An E-commerce dashboard provides a visual overview of business performance.**
- **Creating a dashboard helps track sales, customers, product categories and reviews.**
- **It enables data-driven decision making.**

INFORMATION ABOUT DATASETS

- **Total no of tables: 9**

KPIs

- KPI is a specific, measurable metric that indicates how well a company is performing in relation to its goals and objectives.
- Dashboard with KPIs provides a quick understating of performance without needing to dig through large datasets.
- Empowers users to make faster, more accurate decisions based on real-time information.
